

## **Response for Medical Emergency**

In a medical emergency, common sense should prevail. The top priority is to save life and rescue the victim from the life-threatening situation by the best possible means.

Without affecting the overall top priority of saving life, the following should be done:

1. Call 999 for help.
2. This is optional - If it does not delay any on-site rescue (such as resuscitation), call the Security Unit by dialing 3917 2882 for help.
3. This is optional - If it does not delay any on-site rescue (such as resuscitation), call the UHS by dialing 3917 1999 for medical assistance (Support is only available during office hours).
